The following is an examiner's statement of reasons for allowance: In view of the commercial availability of compound of formula (4) as shown by applicants in their response, the citation of JP references in the specification cannot be considered essential material and thus the improper incorporation of "essential material" objection/rejection is being withdrawn. Applicants' amendments and remarks overcomes remaining 112 rejections of the previous action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
